

VIKTOR VAHTRA

HELPSDESK · SYSTEMS ADMINISTRATION · NETWORKS

OPEN TO INTERNSHIPS · AVAILABLE 2026

IT systems student, graduating 2027. I repair computers through my own ads, have given IT support at my former school, and run a Proxmox lab at home. Looking for a place where I can help real users and manage real servers.

02 EXPERIENCE

Computer repair and IT support

INDEPENDENT · THROUGH MY OWN ADS

I take on jobs from private clients through my own ads and handle them end to end — diagnosis, repair, and handover with an explanation.

- Clean Windows installation and setup on a client machine
- Diagnosed and fixed a WiFi connectivity fault
- Brought an old, non-booting computer back to working order
- Explaining the problem to the client in plain language

IT support at school

VOLUNTEER · FORMER SCHOOL

Helped on the school's IT side: troubleshooting computers, installing and configuring software, and day-to-day help for teachers and students.

Home lab

PERSONAL PROJECT · ONGOING

A Proxmox-based virtualisation setup where I try out services before I need them for real. Most of my skills came from here.

Proxmox Linux VM Windows VM Networking

DJ and music producer — “doesvic”

Performing and producing. Deadlines, setting up gear under pressure and fast troubleshooting in a live situation — the same skills carry over to IT support.

03 EDUCATION

IT systems junior specialist

TARTU RAKENDUSLIK KOLLEDŽ · ITS24 · 2024 — 2027

Networking, Windows Server, Linux/BSD and cybersecurity. Every topic ends with a hands-on lab that I document in a written report.

Certifications

CompTIA Network+ Linux Essentials Cisco CCNA — planned

04 SKILLS

USER SUPPORT

Troubleshooting Windows deployment Hardware swaps Data recovery Client communication

SYSTEMS

Windows 10/11 Windows Server Debian Ubuntu Proxmox Active Directory Group Policy BSD

NETWORKING

05 PROJECTS

COURSEWORK LABS AND PERSONAL PROJECTS

Zabbix monitoring

COURSEWORK LAB

Stood up a Zabbix server on a Debian VM — MySQL backend, agent configuration and network device monitoring with alerting.

Debian

Zabbix

MySQL

Linux lab

COURSEWORK LAB

Debian VM setup from scratch: users and permissions, SSH, SCP transfers, systemd service management and APT package handling.

Linux

Bash

SSH

E-portfolio

PERSONAL PROJECT

Bilingual portfolio site with an admin panel, hosted on GitHub Pages. Written in plain HTML/CSS/JS with no framework.

HTML/CSS

JavaScript

GitHub Pages

PaperMC server

PERSONAL PROJECT

Game server setup and administration: port forwarding, user permissions, backups and performance tuning.

Java

Linux

Networking

XPUIPC IP Manager

PERSONAL PROJECT

A Python tool for managing X-Plane 12 plugin IP settings — a small thing that saves editing config files by hand.

Python

CLI
